

Experience in Project & Asset Management (excerpt)

- Project management in the renewable energy sector (including bio-methane, bio-LNG, wind power & power-to-X)
- Acquisition & contractors support
- Regulatory compliance: Authority communication & permit management
- Substrate sourcing & digestate sales for bioenergy projects
- Process documentation & progress tracking
- Maintenance coordination & service invoicing
- Energy management & energy tax refund processing
- Investor reporting & stakeholder updates
- Supporting structural energy transition initiatives (e.g., natural gas substitution with green hydrogen)

Information and consulting company for renewable energies

Shaping the future with experience and expertise
- since 2002 -

Professional services for

Institutional investors
Project developers
Asset Managers
Consortia
Operators

Expertise for Developers and Operators of Energy Plants

- Site & environmental analysis: Risk and potential assessment for new projects or expansions
- Project development support: Contract initiation, permitting, and stakeholder coordination
- Biogas plant optimization: Consultancy for performance, efficiency, and operational upgrades
- Market & technology analysis: Bid comparisons, process optimization, and data-driven decision-making
- Transaction support: Sales facilitation for energy projects within financially robust networks
- Innovation leadership: Process and project flow improvements through innovative solutions

greenValue operates under a DIN EN ISO 9001:2015-certified quality management system for the company's core services.

- Project Coordination and Project Management
- Mergers & Acquisitions (M&A) Services

Expertise for Asset Managers & Institutional Investors

- Growth strategy implementation: Supporting the acquisition of energy projects and scaling operations
- Performance optimization: Developing and executing improvement strategies for biogas/biomethane plants to enhance efficiency and output
- Process & financial excellence: Boosting technical and economic performance through structured process management and on-site coordination

Expertise in Mergers & Acquisitions Services

- Conducting comprehensive due diligence processes
- Performing on-site inspections to evaluate deficiencies and investment requirements
- Assessing opportunities and risks to inform strategic decisions
- Monitoring transactions to ensure seamless execution
- Facilitating interactive processes with all involved stakeholders
- Supporting post-merger integration for smooth transitions
- Implementing projects aligned with corporate sustainability goals

The renewable energy market evolves rapidly – and so do we. We contribute to regional and international projects and partnerships with unwavering commitment, professional expertise, and a robust network.
